

Flash Collars

For Ground Sleeve and Hinge Base Flagpoles

Atlantic Fiberglass supplies the optional Flash Collar for all Flagpoles 20 through 40 feet.

All flash collars are manufactured of UV resistant, flexible polypropylene. This strong and durable space age material will take the bumps of the lawnmower and weed wacker, while protecting the space around the base of the pole. Attractive and practical, the flash collar is the finishing touch for any Hinge Base or Ground Sleeve flagpole installation.
